#### INDEPENDENT AUDITOR'S REPORT

The Honorable Mayor Thomas Stewart and Members of the Board of Aldermen Village of Albany, Louisiana

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Village of Albany, Louisiana, as of and for the year ended June 30, 2003, which collectively comprise the Village's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Village of Albany, Louisiana's, management. Our responsibility is to express an opinion on these basic financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Governmental Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Village of Albany, Louisiana as of June 30, 2003, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Governmental Auditing Standards, we have also issued our report dated September 26, 2003, on our consideration of the Village of Albany, Louisiana's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be read in conjunction with this report in considering the results of our audit.

### BRUCE HARRELL & CO. CERTIFIED PUBLIC ACCOUNTANTS A Professional Accounting Corporation

The Honorable Mayor, Thomas Stewart and Members of the Board of Aldermen Village of Albany, Louisiana

Page 2

The management's discussion and analysis, budgetary comparison information, and other supplemental schedules on pages 7 through 15, 49 through 52, and 55 through 69 of this report are not a required part of the basic financial statements, but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplemental information. However, we did not audit the information and express no opinion on it.

Our audit was performed for the purpose of forming opinions on the financial statements that collectively comprise the Village of Albany, Louisiana's basic financial statements. The supplemental information schedules listed in the table of contents as Schedules 1 through Schedule 13 are presented for the purpose of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statement taken as a whole.

Bruce Harrell & Company, CPAs

A Professional Accounting Corporation

September 26, 2003

# Required Supplemental Information (Part I) Management's Discussion and Analysis

#### Management's Discussion and Analysis

#### Introduction

The Village of Albany, Louisiana (the Village) is pleased to present its Annual Financial Report developed in compliance with Governmental Accounting Standards Board Statement No. 34, Basic Financial Statements - Management's Discussion and Analysis - For State and Local Governments (GASB 34), and related standards. This is the second year of presentation under the new GASB 34 format.

The Village's discussion and analysis is designed to (a) assist the reader in focusing on significant financial issues, (b) provide an overview of the Village's financial activity (c) identify changes in the Village's financial position (d) identify any significant variations from the Village's financial plan, and (e) identify individual fund issues or concerns.

Since Management's Discussion and Analysis (MD&A) is designed to focus on the current year's activities, resulting changes, and currently known facts, please read it in conjunction with the Village's financial statements on pages 17 through 46 of this report.

#### Village Highlights

- At June 30, 2003, the Village's assets exceeded its liabilities by \$2,456,728 (net assets). Of this amount, \$329,062 (unrestricted net assets) may be used to meet the Village's ongoing obligations to its citizens.
- At fiscal year-end, the total of net assets Invested in Capital, Net of Related Debt (after deducting debt owed on capital assets) increased to \$1,801,582.
- For business-type activities (consisting of the Village's Utility Fund) the Village's debt due to revenue bonds
  decreased by \$29,321. Capital Lease payable increased to \$8,775.
- The most significant continuing revenue sources for governmental activities of the Village consisted of \$128,039 in sales tax revenues, \$30,305 in public utility franchise taxes, \$61,598 for business licenses and permits, \$8,257 for police fines, and \$20,787 in Ad Valorem taxes. Charges for business-type activities of the utility fund were \$299,026 in water charges and \$87,923 in sewer charges.

#### Overview of the Financial Statements

The financial statement focus is on both the Village as a whole and on the major individual funds. Both perspectives, government-wide and major funds, allow the user to address relevant questions, broaden a basis for comparison, and enhance the Village's accountability. The statements then proceed to provide an increasingly detailed look at specific financial activities.

The MD&A is intended to serve as an introduction to the Village's basic financial statements, which consist of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

#### Management's Discussion and Analysis

#### Government-Wide Financial Statements

The government-wide financial statements are designed to provide readers with a broad overview of the Village's finances in a manner similar to a private-sector business. Governmental and business-type activities are presented in separate columns along with a total column for the primary government. If the Village determines that presentation of a component unit (which are other governmental units for which the Village can exercise significant influences or for which the Primary Government financial statements would be misleading if component unit information is not presented) is necessary to allow the reader to determine the relationship of the component unit and primary government, the component unit information is presented in a separate column of the financial statements or in a separate footnote. For the current fiscal year, the Village of Albany has no component units.

The Statement of Net Assets presents information on the Village's assets and liabilities using the accrual basis of accounting, in a manner similar to the accounting used by private business enterprises. The difference between the assets and liabilities is reported as net assets. Over time, the increases or decreases in net assets and changes in the components of net assets may serve as a useful indicator of whether the financial position of the Village is improving or deteriorating.

The Statement of Activities presents information showing how the Village's net assets changed during the most recent fiscal year, focusing on both the gross and net costs of various activities, both governmental and business-type, that are supported by the Village's general tax and other revenues. This in intended to summarize and simplify the reader's analysis of the cost of various governmental services and/or subsidy to various business-type activities.

In both of the government-wide financial statements, the Village's activities are divided into two types:

Governmental activities - Most of the Village's basic services are reported here, including general government, public safety, highways and streets. These activities are financed primarily by property taxes, franchise taxes, sales taxes, and fines.

Business-type activities - The Village charges a fee to customers to help it cover all of the cost of the services provided. The Village's water and sewer utility systems are reported in this section.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule, if applicable, are payments-in-lieu of taxes and other charges between the governments enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

The government-wide financial statements can be found on pages 17 through 19.

#### **Fund Financial Statements**

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Village, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related and legal requirements. The Village of Albany uses two categories of funds to account for financial transactions: governmental funds and proprietary funds.

#### Management's Discussion and Analysis

Governmental funds are used to account for most of the Village's basic services. However, unlike the government-wide financial statements, governmental fund financial statements focus on how money flows into and out of those funds and the balances that are left at year-end that are available for spending. These funds are reported using the modified accrual basis of accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the Village's general government operations and the basic services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the Village's programs. The basic governmental fund financial statements can be found on pages 20 through 23 of this report.

The Proprietary fund accounts for water and sewer services provided by the Village of Albany to its customers. Proprietary funds statements provided the same type of information as the government-wide statements, but the fund presentation provides more detail. The proprietary fund financial statements can be found on pages 24 to 29 of this report.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, there are differences in the information presented for government funds and for governmental activities in the government-wide financial statements. Review of these differences provides the reader of the financial statements insight on the long-term impact of the Village's more immediate decisions on the current use of financial resources. Both the governmental fund Balance Sheet and the governmental fund Statement of Revenues, Expenditures and Changes in Fund Balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. The reconciliations can be found on pages 21 and 23 of this report.

#### Notes to the Financial Statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 31 through 46 of this report.

#### Management's Discussion and Analysis

#### Government-Wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. The following table provides a summary of the Village's net assets for the current year as compared to the prior year. For more detailed information, see the Statement of Net Assets on page 17 of this report.

#### Condensed Statement of Net Assets June 30, 2003 and 2002

| Restricted Unrestricted Total Net Assets                          | 167,898<br>\$ 388,843            | 154,541<br>\$ 327,716            | 326,084<br>161,164<br>\$ 2,067,885   | 305,218<br>228,934<br>\$             | 326,084<br>329,062<br>\$             | 305,218<br>383,475<br>\$ 2,446,677   |

Approximately 74% of the Village's net assets reflects it investment in capital assets (land, buildings, equipment, infrastructure, and improvements) net of any outstanding related debt used to acquire those capital assets. These capital assets are used to provide services to citizens and do not represent resources available for future spending. Although the Village's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets cannot be used to liquidate these liabilities.

Approximately 13% of the Village's net assets represents resources that are subject to external restriction on how they may be used. The Village's restricted net assets consist of cash reserves required by revenue bond agreements and cash for customer deposits net of corresponding liabilities.

Approximately 13% of the Village's net assets are unrestricted and may be used to meet the Village's ongoing obligations to its citizens.

At the end of the current fiscal year, the Village was able to report positive balances in all three categories of net assets, for the government as a whole, as well as for separate governmental and business-type activities.

The Village's activities increased its total net assets by \$10,051. Governmental activities increased by \$61,127. This increase is due primarily to 2002 LCDBG Grant revenue of \$62,660. Business type activities decreased by \$51,076.

#### Management's Discussion and Analysis

In order to further understand what makes up the changes in net assets, the following table provides a summary of the results of the Village's activities for the current year as compared to the prior year. An analysis of the primary sources of these changes follows the table. For more detailed information, see the Statement of Activities on pages 18 and 19 of this report.

#### Governmental Activities

The increase in the Village's total revenues of \$82,807 is due primarily to an increase in operating grants of \$8,905 and 2002 LCDBG capital grant revenue of \$62,660.

Police fines decreased by \$9,241, but were offset by an increase in licenses and permits of \$9,523. The net effect was an increase of \$282 in charges for services.

The decrease in expenses of \$17,034 is due primarily to a decrease in the sidewalk project expense of \$11,016 and a decrease in street department expenses of \$5,890.

#### Management's Discussion and Analysis

#### **Business-Type Activities**

The increase of \$36,869 in the Village's revenues is due primarily to an increase in sewer rates of \$6 per customer and an increase in water rates for customers outside the city limits of \$2 per customer. This increase took effect in February 2003.

The increase in the Village's expenses of \$37,703, consist primarily of an increase in salary expense of \$11,448 an increase in contract services of \$7,694, an increase in depreciation expense of \$4,990, an increase in professional services of \$5,129 and an increase in utilities - electricity of \$7,338.

See pages 18 to 19 for a more detailed Statement of Activities for the Village of Albany.

#### **Fund Financial Analysis**

#### Governmental Funds

The focus of the Village's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Village's financing requirements. In particular, unreserved fund balance may serve as a useful measure of the Village's net resources available for spending at the end of the year. The basic governmental fund financial statements can be found on pages 20 through 23 of this report.

The general fund is the chief operating fund of the Village. At the end of the current year, the total unreserved fund balance for the general fund was \$167,898. Of this amount, \$22,000 was designated for the future construction of a community center. This represents an increase of \$13,357 or 9% of the prior year's ending balance. As a measure of the general fund's liquidity, it may be useful to compare the unreserved fund balance and total general fund expenditures. The unreserved fund balance represents 67% of total general fund expenditures.

The only other major fund, the capital project fund, reported no change in fund balance as compared to the prior year, with beginning and ending fund balances of zero.

#### **Proprietary Fund**

The Village's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

#### General Fund Budgetary Highlights

The Village of Albany demonstrated legal compliance by amending its budget in accordance with provisions of the Local Government Budget Act. Actual revenues and other sources were within 5% of budgeted revenues and other sources, and actual expenditures did not exceed budgeted expenditures and other uses by 5%.

For the general fund, actual revenues and other sources exceeded final budgeted amounts by \$19,470. Actual expenditures and other uses were \$7,361 less than final budgeted amounts. Actual excess revenues and other uses were \$26,831 more than final budget amounts.

#### Management's Discussion and Analysis

For the general fund, original budgeted revenues and other sources were \$267,700 and final budgeted revenues and other sources were \$255,226. Original budgeted expenditures and other uses were \$292,100 and final budgeted expenditures and other uses were \$268,700.

The only significant variations from the original budgeted revenues and expenditures for the General Fund were as follows:

- Summer Youth Salaries were decreased by \$9,300.
- Election Expense was decreased by \$2,900.
- Capital Outlay expenses for General and Administrative, Police Department and Street Department were decreased by \$2,000, \$3,100 and \$8,900.
- Other Street Expense was decreased by \$7,100.

#### Capital Assets and Debt Administration

#### **Capital Assets**

The Village of Albany elected early implementation of GASB 34 in the fiscal year ending June 30, 2002. However, as a Phase III government (a government with annual revenues of less than 10 million), the Village elected not to retroactively report infrastructure assets prior to implementation. Historically, a government's largest group of assets, infrastructure assets (roads, bridges, street lighting, etc.) have not been reported nor depreciated in governmental financial statement. Beginning with the fiscal year ended June 30, 2002, these assets are now valued and reported within the governmental activities column of the government-wide financial statements.

The Village's investment in capital assets for its governmental and business-type activities as of June 30, 2003 amounts to \$3,097,319 (net of depreciation). The total decrease in the Village's investment in capital assets for the current fiscal year was \$29,592 (net of depreciation).

Major capital asset events during the current year included the completion of the water system improvement on Courtney Lane and Blount Road and preliminary engineering fees regarding the 2002 Louisiana Community Development Block Grant recorded as construction in progress.

#### Management's Discussion and Analysis

The following table provides a summary of the Village's capital assets (net of depreciation) at the end of the current year as compared to the prior year. For more detailed information, see Note 7 to the financial statements on pages 40 and 41 of this report.

#### Long-Term Debt

At June 30, 2003, the Village had total debt outstanding of \$1,295,737. Of this total, \$39,205 is due within one year and \$1,256,532 is due within greater than one year. The following table provides a summary of the Village's outstanding debt at the end of the current year as compared to the prior year. For more detailed information, see Note13 to the financial statements on pages 43 and 44 of this report.

#### **Economic Factors**

The Village of Albany's management approach is conservative. When possible, the Mayor and Aldermen attempt to provide services for the Village based on existing revenues and to finance long-term projects only when necessary. Within "Governmental Activities", primarily the Village's General Fund, the Village has not incurred long-term debt, and the Village maintains a positive balance of \$167,898 in Unrestricted Net Assets. For the fiscal year ending June 30, 2003, there was an "Excess of Revenues Over Expenditures and Other Uses" in the amount of \$13,357, as compared to a "Deficiency of Revenues Over Expenditures and Other Uses" of \$39,162 for the fiscal year ending June 30, 2002.

#### Management's Discussion and Analysis

For "Business-Type Activities" (Water and Sewer Funds), the Village of Albany also maintains a positive balance of \$161,164 in Unrestricted Net Assets, although this does represent a decrease of \$67,770 from the prior fiscal year. This decrease in Unrestricted Net Assets is due primarily to losses incurred by operation of the Village's sewer utilities. Whereas water utilities have generated profit (\$50,100 for the fiscal year 2003, and \$33,314 for fiscal year 2002), operation of the sewer system has been at a loss because of system expansion and mandated improvements. For the fiscal year ending June 30, 2003, the sewer system incurred a net loss of \$101,176, and a net loss of \$93,556 for year 2002. Of the total loss of \$101,176 for the fiscal year ending June 30, 2003, a total of \$82,592 involves depreciation expense, which does not represent a direct outflow of cash. However, depreciation expense does represent an estimate of funds that should be placed in reserve for future replacement of capital assets.

Due to the continued loss in the Business-Type Activities, the Village of Albany was forced to raise residential sewer rates by \$6 per customer and water rates for customers outside the city limits by \$2 per customer.

#### Requests for Information

This financial report is designed to provide a general overview of the Village of Albany's finances and to demonstrate the Village's accountability. If you have questions regarding this report or need additional information, contact the Village at Post Office Box 1000, Albany, LA 70711. The phone number for the Village is (225) 567-1101.

### Notes to the Financial Statements

#### As of and for the Year Ended June 30, 2003

#### Introduction

The Village of Albany, Louisiana was incorporated October 7, 1953, under the provisions of the Lawrason Act (LSA-RS 33:321). The Village operates under a Mayor/Board of Aldermen form of government. The Mayor and each of three aldermen are elected at large for a term of four years. The Village of Albany is located approximately 30 miles east of Baton Rouge, Louisiana, on LA Highway 43 (Montpelier Avenue) north of Interstate 12, with U.S. Highway 190 intersecting the northern part of the Village. The total population of the Village of Albany, Louisiana is 865, as reported by the U.S. Census Bureau, Census 2000. The Village provides police protection services, services to maintain or develop streets, drainage, sanitation, support of recreation activities, general and administrative services, and utilities services for area residents. Utility services include water and sewer and are provided to a total of 1,237 water customers and 318 sewer customers. The Village employs 6 full-time employees in addition to the Mayor and Board of Aldermen.

Governmental Accounting Standards Board (GASB) Statement No. 14 established criteria for determining the reporting entity and component units that should be included within the reporting entity. Under provisions of this statement, the Village of Albany is considered a primary government, since it is a special purpose government that has a separately elected governing body, is legally separate, and is fiscally independent of other state and local governments. As used in GASB Statement No. 14, fiscally independent means that the Village may, without the approval or consent of another governmental entity, determine or modify its own budget, levy its own taxes or set rates or charges, and issue bonded debt. There are no other component units which the Village of Albany has an oversight relationship.

#### 1. Summary of Significant Accounting Policies

#### A. Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

#### As of and for the Year Ended June 30, 2003

#### B. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessment receivable, if any, due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The Village reports the following major governmental funds:

The General Fund is the Village's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in other funds.

The Capital Project Fund accounts for financial resources received and used for the acquisition, construction, or improvement of capital facilities not reported in the other governmental funds.

The Village reports the following major proprietary funds:

Enterprise Fund - accounts for operations (a) that are financed and operated in a manner similar to private business enterprise where the intent of the governing body is that costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user fees, or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise

#### As of and for the Year Ended June 30, 2003

funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule, if applicable, are payments-in-lieu of taxes and other charges between the governments enterprise operations. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the proprietary funds are user charges for the services provided by the enterprise funds Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the Village's policy to use restricted resources first, then unrestricted resources as they are needed.

#### C. Deposits and Investments

The Village's cash and cash equivalents are considered to be cash on hand, demand deposits, time deposits, and short-term investments with original maturities of three months or less from the date of acquisition. State law and the Village's investment policy allow the Village to invest in collateralized certificates of deposit, government- backed securities, commercial paper, the state-sponsored investment pool and mutual funds consisting solely of government backed securities.

Investments for the Village are reported at fair market value. The state investment pool, LAMP, operates in accordance with state laws and regulations. The reported value of the pool is the same as the fair value of the pool shares.

#### D. Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

#### As of and for the Year Ended June 30, 2003

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade and property tax receivables are shown net of an allowance for uncollectible amounts.

Property taxes are levied on a calendar year basis and become due on January 1 of each year. The following is a summary of authorized and levied ad valorem taxes:

|                            | Authorized | Levied  | Expiration |
|----------------------------|------------|---------|------------|
|                            | Millage    | Millage | Date       |
| General Corporate Purposes | 6.65       | 6.65    | None       |

Sales Taxes are levied at one percent. The proceeds of this sales and use tax are dedicated to general corporate purposes.

#### E. Inventories and Prepaid Items

All inventories are valued at cost using the first-in/first-out method. Inventories of the governmental funds are recorded as expenditures when consumed rather than when purchased. Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

#### F. Restricted Assets

Certain proceeds of the Enterprise Fund revenue bonds, as well as certain resources set aside for their repayment, are classified as restricted assets because their use is limited by applicable debt covenants.

#### G. Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g. roads, bridges, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are capitalized at historical cost or estimated cost if historical cost is not available. Donated assets are recorded as capital assets at their estimated fair market value at the date of donation. The Village maintains a threshold level of \$500 or more for capitalizing capital assets.

The Village elected early implementation of GASB 34 in the fiscal year ending June 30, 2002. However, as a Phase III government (a government with annual revenues of less than \$10 million), the Village elected not to retroactively report infrastructure assets prior to implementation. Historically, a government's largest group of assets, infrastructure assets (roads, bridges, street lighting, etc.) have not been reported nor depreciated in governmental financial statements. Beginning with the fiscal year ended June 30, 2002, these assets are now valued and reported within the governmental activities column of the government-wide financial statements.

The cost of normal maintenance and repairs that do not add to the value of the assets or materially extend their lives are not capitalized.

#### As of and for the Year Ended June 30, 2003

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

All capital assets, other than land, are depreciated using the straight-line basis over the following useful lives:

| Buildings              | 20 - 40 Years |
|------------------------|---------------|
| Improvements           | 20 - 40 Years |
| Vehicles and Equipment | 5 - 15 Years  |
| Infrastructure         | 20 - 40 Years |
| Water Utility System   | 20 - 40 Years |
| Sewer Utility System   | 20 - 40 Years |

#### H. Compensated Absences

The Village has the following policy relating to vacation and sick leave:

Each employee with one (1) year service is given five (5) days vacation leave; each employee with five (5) years service is given ten (10) days vacation leave; each employee with ten (10) years service is given fifteen (15) days vacation leave; each employee with fifteen (15) years service will be given twenty (20) days vacation leave; each employee with twenty (20) years service will be given twenty-five (25) days vacation leave; employees with twenty-five (25) years service will be given the maximum thirty (30) days vacation leave. The Village employees are required to take all accrued vacation before December 31, of each year except employees with ten or more years of service may be paid up to a maximum of ten days of accrued vacation leave.

Each employee earns sick leave at the rate of 5/12 day for each month worked. Sick leave is accumulated for an indefinite period with a maximum sick leave of twenty-five (25) days.

The cost of leave privileges, computed in accordance with GASB Codification Section C60, is recognized as a current-year expenditure in the governmental fund when leave is taken.

In accordance with GASB-16, Accounting for Compensated Absences, no liability has been accrued for unused employee sick leave.

#### I. Long-Term Obligations

In the government-wide financial statements and the proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts as well as bond issuance costs during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt

#### As of and for the Year Ended June 30, 2003

issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

#### J. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change.

#### K. Comparative Data/Reclassifications

Comparative total data for the prior year have been presented only for individual enterprise funds in the fund financial statements in order to provide an understanding of the changes in the financial position and operations of these funds. Also, certain amounts presented in the prior year data have been reclassified in order to be consistent with the current year's presentation.

#### L. Extraordinary and Special Items

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events within the control of the municipality, which are either unusual in nature or infrequent in occurrence.

#### M. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America require management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

#### N. Reconciliations of Government-Wide and Fund Financial Statements

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets is presented in Statement D of the basic financial statements. Explanation of certain differences between the governmental fund statement of revenues, expenses, and changes in fund balances and the government-wide statement of activities is presented in Statement F of the basic financial statements.

### As of and for the Year Ended June 30, 2003

### 2. Stewardship, Compliance and Accountability

The Village uses the following budget practices:

- 1. The Village Clerk prepares a proposed budget and submits same to the Mayor and Board of Aldermen no later than fifteen days prior to the beginning of each fiscal year.
- 2. A summary of the proposed budget is published and the public notified that the proposed budget is available for public inspection. At the same time, a public hearing is called.
- 3. A public hearing is held on the proposed budget at least ten days after publication of the call for the hearing.
- 4. After the holding of the public hearing and completion of all action necessary to finalize and implement the budget, the budget is adopted through passage of an ordinance prior to the commencement of the fiscal year for which the budget is being adopted.
- 5. Budgetary amendments involving the transfer of funds from one department, program or function to another or involving the increase in expenditures resulting from revenues exceeding amounts estimated, require the approval of the Board of Aldermen.
- 6. All budgetary appropriations lapse at the end of each fiscal year.
- 7. Budgets for the general, capital projects, and enterprise funds are adopted on a basis consistent with generally accepted accounting principles (GAAP). Budgets for enterprise funds are presented on the accrual basis of accounting. Other governmental funds are presented on the modified accrual basis of accounting. Accordingly, the budgetary comparison schedules present actual expenditures in accordance with the accounting principles generally accepted in the United States on a basis consistent with the legally adopted budgets as amended. All budgetary amounts presented reflect the original budget and the amended budget (which have been adjusted for legally authorized revisions of the annual budget during the year).

### 3. Cash and Cash Equivalents

At June 30, 2003, the Village has cash and cash equivalents (book balances) totaling \$685,137 as follows:

| Cash on Hand                     | \$ 25      |
|----------------------------------|------------|
| Interest-Bearing Demand Deposit  | 493,820    |
| Louisiana Assets Management Pool | 177,471    |
| Time Deposits                    | 13,821     |
|                                  | \$ 685,137 |

These deposits are stated at cost, which approximates market. Under state law, these deposits (or the resulting bank balances) must be secured by federal deposit insurance or the pledge of securities owned by the fiscal agent bank. The market value of the pledged securities plus the federal deposit insurance must at all times equal the amount on deposit with the fiscal agent. These securities are held in the name of the pledging fiscal agent bank in a holding or custodial bank that is mutually acceptable to both parties.

### As of and for the Year Ended June 30, 2003

At June 30, 2003, the Village has \$514,657 in deposits (collected bank balances). These deposits are secured from risk by \$113,821 of federal deposit insurance and \$400,836 of pledged securities held by the custodial bank in the name of the fiscal agent bank (GASB Category 3).

Even though the pledged securities are considered uncollateralized (Category 3) under the provisions of GASB Statement 3, Louisiana Revised Statute 39:1229 imposes a statutory requirement on the custodial bank to advertise and sell the pledged securities within 10 days of being notified by the Village that the fiscal agent has failed to pay deposited funds upon demand.

#### 4. Investments

Investments are categorized into these three categories of credit risk:

1) Insured or registered, or securities held by the Village or its agent in the Village's name, 2) uninsured and unregistered, with securities held by the counterparty's trust department or agent in the Village's name, or 3) uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent but not in the Village's name.

All investments held by the Village fall into category I credit risk, defined as "insured or registered, or securities held by the Village of Albany or its agent in the Village of Albany's name." In accordance with GASB 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools, all investments are carried at fair market value, with the estimated fair market value based on quoted market prices.

Investments held by the Village of Albany at June 30, 2003, are as follows:

|  | Fair          |      | Total Carrying |
|--|---------------|------|----------------|
|  | <br>Value     |      | Amount         |
| Louisiana Asset Management Pool (LAMP) | \$<br>177,471 | _ \$ | 177,471        |

In accordance with GASB Codification Section I50.165, the investment in LAMP at June 30, 2003, is not categorized in the three risk categories provided by GASB Codification Section 150.164 because the investment is in the pool of funds and therefore not evidenced by securities that exist in physical or book entry form. LAMP is administered by LAMP, Inc., a nonprofit corporation organized under the laws of the State of Louisiana, which was formed by an initiative of the State Treasurer in 1993. The corporation is governed by a board of directors comprising the State Treasurer, representatives from various organizations of local government, the Government Finance Office Association of Louisiana, and the Society of Louisiana CPAs. Only local governments having contracted to participate in LAMP have an investment interest in its pool of assets. The primary objective of LAMP is to provide a safe environment for the placement of public funds in short-term, high-quality investments. The LAMP portfolio includes only securities and other obligations in which local governments in Louisiana are authorized to invest. Accordingly, LAMP investments are restricted to securities issued, guaranteed, or backed by the U.S. Treasury, the U. S. Government, or one of its agencies, enterprises, or instrumentalities, as well as repurchase agreements collateralized by those securities. The dollar weighted average portfolio maturity of LAMP assets is restricted to not more than 90 days, and consists of no securities with a maturity in excess of 397 days. LAMP is designed to be highly liquid to give its participants immediate access to their account balances. At June 30, 2003, all investments held by the Village are classified as cash equivalents.

### As of and for the Year Ended June 30, 2003

#### 5. Receivables

In the government-wide statements, receivables consist of all revenues earned at year-end and not yet received. Allowances for uncollectible accounts are based upon historical trends and the period aging and write-off of accounts receivable. Major receivables balances for the governmental activities include sales taxes, franchise taxes, occupational licenses, and fines. Business-type activities report utilities earnings as their major receivable.

In the fund financial statements, material receivables in governmental funds include revenue accruals such as sales tax, franchise taxes, occupational licenses, fines, and other similar intergovernmental revenues since they are usually both measurable and available. Non-exchange transactions collectible but not available are deferred in the fund financial statements in accordance with modified accrual, but not deferred in the government-wide financial statements in accordance with the accrual basis. Interest and investment earnings are recorded only if paid within 60 days since they would be considered both measurable and available. Proprietary fund revenues consist of all revenues earned at year-end and not yet received. Utility accounts receivable comprise the majority of proprietary fund receivables. Allowances for uncollectible accounts receivable are based upon historical trends and the periodic aging and write-off of accounts receivable.

The General Fund receivables at June 30, 2003 consist of the following:

| Taxes:       |                 |  |  |
|--------------|-----------------|--|--|
| Public Ut    | ility Franchise |  |  |
| Sales and    | Use             |  |  |

#### 8. Construction in Progress

The Village of Albany was awarded a Louisiana Community Development Block Grant in the amount of \$748,136 for water system improvements. The project involves the construction of a municipal water well and waterlines to increase the capacity of water pressure to the entire Albany Water Distribution System. At June 30, 2003, the construction in progress was \$62,660.

#### 9. Pension Plans

The Village of Albany, Louisiana participates in a Simple IRA Retirement Plan administered by Edward Jones. The plan covers employees who are reasonably expected to earn five thousand dollars in compensation for the calendar year. The Village will contribute a matching contribution of 3 percent of each employee's annual income. Retirement expense for the year ended June 30, 2003 was \$3,064 for the General Fund and \$706 for the Utility Fund.

### As of and for the Year Ended June 30, 2003

#### 10. Other Post-Retirement Benefits

All of the Village of Albany's employees participate in the Federal Social Security Program. The Village's contributions for the year ended June 30, 2003, were \$10,568 for General Fund employees and \$5,117 for the Enterprise Fund employees. Future deficits in the system will be financed by the United States Government, and the Village has no further liability in the system. Data concerning the actuarial status of the system is not available.

### 11. Accounts, Salaries, and Other Payables

The payables of \$38,791 at June 30, 2003 are as follows:

|                        | General |        | General Capital Project |             | Capital Project |             |       | Proprietary |  |  |

#### 14. Flow of Funds and Restrictions on Use - Utilities Revenues

The voters of the Village of Albany, Louisiana approved the issuance of \$530,000 Utility Revenue Bonds in an election held May 7, 1977. The governing authority adopted a resolution on July 12, 1977, and subsequently amended on August 9, 1977, and January 5, 1978, authorizing issuance of \$523,000 of Utility Revenue Bonds. The proceeds of the bonds are restricted for use in acquiring through purchase, improvement and construction of a waterworks system and subject to the provisions of the above referenced resolutions. In connection with the project, the Village was approved for grants from Rural Utility Service (RUS) of the United States of America in the amount of \$356,500. The Village sold \$523,000 of the authorized bonds to Rural Utility Service. The bonds were issued for forty(40) years payable with interest at the rate of five percent (5%) per annum. The bonds and any installment may be paid prior to the due date and maturity thereof at a price of par and accrued interest to the date of prepayment.

\$65,000 of the proceeds were used prior to June 30, 1978, to acquire an existing water system and \$842,624 has been used in improvements and additional construction of the new waterworks system. During the fiscal year ended June 30, 1980, the Village received a grant of \$39,977 from the State of Louisiana, Department of Transportation and Development to be used in the project.

A resolution authorizing the issuance of \$575,000 of Water Revenue Bonds of the Village of Albany, Louisiana, State of Louisiana, to acquire and construct improvements and extensions to the waterworks system of the Village was adopted December 14, 1987. The bonds were sold to Rural Utility Service (RUS) and are due in forty(40) annual payments with interest calculated on unpaid principal at a rate of five and three-fourths percent (5 3/4%) per annum. The Village may prepay the whole or any part of the principal amount of any installment at any time in inverse chronological order at the principal amount thereof and accrued interest to the date fixed for prepayment.

A resolution authorizing the issuance of \$530,000 of Sewer Revenue Bonds of the Village of Albany, Louisiana, State of Louisiana, for the improvement and construction of a sewerage system of the Village was adopted October 14, 1991. The bonds were sold to Rural Utility Service (RUS) and are due in monthly installments of \$2,666 for forty(40) years with interest at a rate of five and one-fourth percent (5 1/4%) per annum. The Village may repay the whole or any part of the principal amount at any time. Under the terms of the bond proceeds to the Village, the

### As of and for the Year Ended June 30, 2003

revenue bonds are payable as to principal and interest solely from the income and revenues derived from the operation of the combined utility system of the Village after provision has been made for payment of the reasonable and necessary expenses of administering, operating, and maintaining the system. These bonds do not constitute an indebtedness or pledge of the general credit of the Village within the meaning of any constitutional or statutory limitation of indebtedness.

Each month there will be set aside into a fund called "Bond and Interest Sinking (Redemption) Fund" a sum equal to one-twelfth (1/12) of the interest due on the next interest payment due, and, in addition, a sum equal to one-twelfth (1/12) of the principal payment due, together with such proportionate sum as may be required as the same respectfully become due on such date. Money in the Sinking Funds shall be deposited as Trust Funds and shall be fully sufficient to assure the prompt payment of the principal and interest installments as they become due, and may be used only for such payments. As of June 30, 2003, the Sinking Fund was fully funded with a balance of \$58,151.

There shall also be set aside into a "Utility System Bond Reserve Fund" a sum equal to five percent (5%) of the monthly bond payment, or \$418 after the construction becomes revenue producing until there is accumulated therein an amount equal to the highest annual debt service payment in any future year. Such amounts may be used only for the payment of maturing bonds and interest coupons for which sufficient funds are not on deposit in the Bond and Interest Sinking Fund as to which there would otherwise be default. As of June 30, 2003, the Reserve Fund was fully funded with a balance of \$151,045.

Funds will also be set into a "Depreciation and Contingency Fund" after completion of the project at the rate of \$485 per month until the balance in this fund amounts to the maximum required by RUS. Money in this fund will be used for making extraordinary repairs or replacements to the system which are necessary to keep the system in operating condition, enhance its revenue-producing capacity, or provide for a higher degree of service for which money is not available as a maintenance and operation expense. Money in this fund may also be used to pay principal and interest on the bonds falling due at any time there is not sufficient money for the other bond funds. As of June 30, 2003, the Depreciation and Contingency Fund was fully funded with a balance of \$99,657.

All the revenues received in any fiscal year and not required to be paid in such fiscal year into any of the above noted funds shall be regarded as surplus and may be used for any lawful corporate purpose.

### 15. Reserved and Designated Retained Earnings/Fund Balances

Within the General Fund unreserved fund balance, the Village of Albany designated \$22,000 received from the sale of the old town hall, toward the future construction of a community center in Albany.

At June 30, 2003, the proprietary fund had restricted net assets of \$326,084, representing the Village's funds restricted by revenue bond debt covenants and contracts with customers for meter deposits, net of the related liability.

#### 16. Litigation

There is no outstanding litigation as of June 30, 2003.

### As of and for the Year Ended June 30, 2003

### 17. On-behalf Payments

During the year ended June 30, 2003, the Village had the following on-behalf payments, which were recorded as revenues when received and expenditures when the cost was incurred as required by GASB Statement 24:

State Supplemental Payment, Policemen

\$ 7,200

### **Subsequent Events**

### 18. Sidewalk Program

The Village of Albany, Louisiana entered into an agreement with the Department of Transportation and Development that will consist generally of constructing a total of approximately 7,980 feet of concrete sidewalks east along US 190 from Reeves Rd. to its intersection with Hwy. 43 then turning north along Hwy. 43 to the Village limits. The cost of this project will be a joint participation between the Village of Albany, Louisiana and the Federal Highway Administration, with the Village of Albany, Louisiana paying 5 percent of the construction cost and 100 percent of all design and construction engineering costs. The Federal Highway Administration will pay 95 percent of the construction cost, through the Department of Transportation and Development. Phase I of this project was completed during 2001 and Phase II is anticipated to begin during the fourth quarter of 2003. The total estimated project cost of Phase II is \$120,116.

Schedule 12

### Summary Schedule of Prior Year Audit Findings Year Ended June 30, 2003

### Section I - Internal Control and Compliance Material to the Financial Statements

No section I findings.

Section II - Internal Control and Compliance Material to Federal Awards

Reference Number 2002-F1

Fiscal Year Finding Initially Occurred: June 30, 2002

### Description of Finding:

In the prior year we noted the Village was in noncompliance with the Rural Utilities Service (RUS) revenue bond restrictions requiring adequate rates for sewer services. The bond agreement requires that the Village fix and maintain rates and collect charges for all services and facilities to be rendered by the system sufficient to provide for the payment of the reasonable and necessary expenses of operating the system, to provide for bond principal and interest payments and all other debt obligations, to provide for a reserve fund, and to provide a depreciation and contingency fund to care for depreciation, extensions, additions, improvements and replacements necessary to operate the system properly.

We recommended the following:

Review the current rate structure for sewer to determine the rate increase required. Based on review of current revenues and debt requirements, a minimum rate increase of six dollars per customer is recommended. This rate increase should provide sufficient cash flow for the Village to fund debt service requirements, although the Village will continue to show a net loss after recording approximately \$81,000 in depreciation expense per year.

Planned Corrective Action: We will review the current operation of the sewer system to determine the level of rate increase that is feasible.

Corrective Action Taken: Partial

Planned Corrective Action/Partial Corrective Action Taken: The Village of Albany raised sewer rates by \$6 per customer and water rates by \$2 per customer. The increase in rates took effect in February 2003. This corrective action is listed as partial since the Sewer system operations showed a net loss of \$101,176, for the fiscal year ending June 30, 2003, as compared to a net loss of \$93,556 for the prior fiscal year ending June 30, 2002. Unrestricted net assets at June 30, 2003 totaled \$161,164, decreasing \$67,770 from the prior fiscal year. Water system operations continue to show a positive income of \$50,100 for the fiscal year ending June 30, 2003.

# REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Honorable Mayor Thomas Stewart and Members of the Board of Aldermen Village of Albany, Louisiana

We have audited the basic financial statements of the Village of Albany, Louisiana, as of and for the year ended June 30, 2003, and have issued our report thereon dated September 26, 2003. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

### Compliance

As part of obtaining reasonable assurance about whether the Village of Albany, Louisiana's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed one instance of noncompliance that is required to be reported under *Governmental Auditing Standards*, which is described in the accompanying Summary Schedule of Prior Year Auditing Findings as Item 2002-F1.

### **Internal Control Over Financial Reporting**

In planning and performing our audit, we considered the Village of Albany, Louisiana's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the primary government financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the primary government financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.
